

Purpose

The American Society of Nephrology (ASN) continuing education (CE) program strengthens the knowledge, skills, and performance of the interprofessional nephrology health care team. Through evidence-based education, the program promotes collaboration, enhances clinical decision-making, and strengthens team performance to improve patient outcomes.

Content Areas

The ASN CE program must align with ACCME, AMA, and Joint Accreditation standards, with a focus on topics relevant to nephrology, including general nephrology, hypertension, dialysis, and transplantation.

Target Audience

The ASN CE program serves a diverse, interprofessional health care team, including physicians, scientists, advanced practitioners, nurses, pharmacists, and other health professionals working and training in nephrology.

Types of Activities

The ASN CE program includes live courses, enduring materials, and other worthwhile educational formats as needed.

Expected Results

The ASN CE program is designed to:

- **Enhance knowledge** of the interprofessional nephrology health care team by providing updates on new developments in the field of nephrology and related sciences.
- **Strengthen skills and strategies** to support effective clinical decision-making and team-based care.
- **Improve team performance** by advancing best practices in diagnosis, treatment, and patient management.
- **Foster collaboration** among health care professionals to address practice gaps and improve patient outcomes.
