

Trainees Track

The ASN Workforce Committee has developed a suggested learning track for medical students and residents. This track is intended to help trainees gain the most from their participation in the ASN Annual Meeting and Scientific Exposition. ASN has organized the learning track by both meeting day/time and session type. Please note that trainees have several choices within the suggested track during some time periods—all of these selections should be of interest to medical students and residents. Finally, please note that this learning track is intended as a guide: Trainees are free to attend any sessions not included in the learning track.
