

B-Cell Modulation in IgA Nephropathy

Objectives

- 1 Understand the role of B cells and key cytokines in immune-mediated kidney disease
- 2 Explore current and emerging B-cell-targeted strategies
- 3 Describe the disease burden and progression of IgAN
- 4 Review the role of APRIL in the 4-hit process of IgAN

Presenters

Dana Rizk, MD

Professor of Medicine,
Division of Nephrology
University of Alabama
at Birmingham

**Maria-Gabriela Velez,
MD, PhD**

Clinical Nephrologist
Kidney Associates of Colorado

Shikha Wadhwani, MD

Director of Clinical Trials, Division of Nephrology
Vice Chair of Clinical Research, Department of Medicine
The University of Texas Medical Branch – Galveston

Presentation Logistics

Date and Time

November 6 | 1:00 PM - 1:45 PM CT

Location

Exhibit Hall D | Theater #3
George R. Brown Convention Center, Houston, TX

The Exhibitor Spotlight is not a Continuing Education (CE) activity.

APRIL, a proliferation-inducing ligand; IgAN, IgA nephropathy.
