Vaccinate your family this flu season. It’s the best way to fight flu.

If you haven’t already, you can still get vaccinated. As long as flu viruses are circulating, it’s not too late to get vaccinated.

Vaccination is especially important for protecting people at high risk of serious flu complications, including:

- young children
- pregnant women
- adults 65 years and older
- anyone with chronic health conditions like asthma, diabetes, or heart disease.

IT’S NOT TOO LATE TO GET YOUR FAMILY VACCINATED!

National Influenza Vaccination Week (NIVW)
December 6-12, 2020
